

Why did I call you altogether?

To give us all hope and opportunity in a down economy.

The Global Economic situation is in need of solutions to the large influx of new Entrepreneurs.

What do we do with all these new Entrepreneurs? How can we work together to find opportunities that will generate incomes for those of you in need of a better life? How do we “**Connect**”?

1. **Wideband** for those sitting at home on their couch's will change the paradigm of the Software Industry, including the Social Media startups, like FaceBook, Google, Microsoft, Yahoo, etc.
2. **Education via eLearning** from the **Wideband Internet** will provide the **Access** to these and many other individuals, from High School Dropouts to **MBA's**. I figure the PHd's are still in demand... *The EDU Plan is not aimed at traditional K12, we need to help those that need help looking for a better job.*
3. **Boating Industry** as an example, has taken a crash dive, and needs reemployment due to lack of sales. The individuals I find that LinkedIn is suggesting that I connect to, are in a sad situation, due to fuel costs, no Bank Loans, no Buyers, Legal actions, etc. We need to retrain, assist, and find new business opportunities for these individuals...
4. **Internet companies** are still failing to achieve sales levels on a continuous quarterly basis, some are public corporations, and will probably need to consolidate, regroup, reduce, improve revenues, etc. The main reason for **Wideband** is to provide the next generation of APPS via companies based on the Internet.
5. **Wideband** or **Fiber to the House** install videos are on YouTube, *How to splice fiber, connect Fiber from the curb, to your Home Server or AiLibrary*, because **Your Data is Your Data!** *So your local storage is still required* even though you have a copy of your digital stuff in the Cloud...
6. **EDU Plan for High School Dropouts**. We have a unsustainable number of High School Drop Outs, some are getting older, have family's and need to become Tax paying mature educated workers... **eLearning** in the form of a Playstation or XBOX that keeps your eye on winning, to get to the next level or replay current level, until success, needs a Game that is a attention grabber, that connects user's as the Videos Games of todays First Person Shooter do... **If we could change Education to be ENJOYABLE** as today's top Video Games, we could educate those spending many hours per day sitting on their couch's...
7. **EDU Plan for successful individuals** with some College to MBA's is needed to refresh and/or allow graduation from their living rooms. Business Colleges such as Phoenix, Heald, etc. need a higher number of GRADUATES who have been seduced into Student Loan Programs but did not complete their education, yet are responsible to repay their Student Loans...

8. **EDU Plan for Employment and Corporate Training Courseware** on a continuous basis is needed to allow individuals to learn and stay current with their employment education requirements from their couch's... **Gas is expensive today...**
9. **Wideband is simply Broadband without performance (throttling) billing issues.**
10. **4K HDTV is coming to the home from Japan**, new **4K Ultra HD** projectors are available now, **4K AV Receivers** that **upscale HDTV to Ultra HD** are in the pipeline of Japan's electronic's industry that allow a improvement of resolution to today's HDTV's. **85" Ultra HDTV's** (3D no glasses) are in the pipeline from Japan. Do you realize that **elearning** improves with HDTV resolution? **4K Ultra HD Camcorders** are in the pipeline for \$5,000, just like we had a few years ago for the first HD Camcorders that are now in your iPhone...
11. **Digital Storytelling** using a **4K HD iPhone/Android Phone** is probably not that far away... Your children will use this technology to see things you and I have never seen. Pocket Microscope Smartphones?
12. **4K HD requires much higher Bandwidth.**
13. I was on **StarPower Entertainments Board of Directors** for 10 years, and have been in the forefront of the Computer Industry Technology curve all my life...
14. **GHK AiLibrary** is now over 10 years old.
15. **EDU Plan is for the increase of Entrepreneurs due to the economy.** During the Reagan years we called **Consultants - Professionally Unemployed...** Entrepreneurs are the same kind of individuals.
16. How many **Social Media Experts** does it take to change a Light Bulb? All of them.
17. **Do I think I can run the EDU Plan? NO! but you can!**
18. **3D Printers have evolved and a Professor is promoting build houses with a Tonka Sized 3D printer... see TEDx.**
19. **Rapid Construction of anything.**
20. **Farming improvements.**
21. **Ocean research projects, Rovers, Robots, etc. more that just the NET and Software...**
22. **We can build anything we can think of today...**
23. **We just landed Curiosity on Mars...**
24. **Sell America via Aloha on Tour...**
25. **Limitless ideas of today's Business Incubators need Sales and Marketing and Funding.**
26. **Angel Investors need assurance of a ROI! Congress get busy...**
27. **Trickle Down Economy only works with a ROI, or no Trickle...**

EDU Plan - Build it, they will come.
